募集要項

This mid-level Data Analyst role involves supporting the internal access log analytics platform by providing data analysis and analytics tag implementation support. The position bridges the gap between clients and development teams to enhance data-driven decision-making.

Client Details

A global leader in e-commerce, fintech, digital content, and communications, renowned for its innovation work environment. Join us to be part of a forward-thinking company that offers vast opportunities for growth and development in a diverse and inclusive culture.

Description

- Answer inquiries on user behavior log data specifications
- Investigate and resolve data-related issues
- Create analysis reports using SQL or Python
- Collaborate with data pipeline and analytics tag development teams
- Guide clients on analytics tag implementation
- Troubleshoot tag/SDK implementation issues

Job Offer

- Working time: 09:00-17:30
- Hybrid working style

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Jeff Liao at +81 3 6832 8607.

スキル・資格

- Experience in data analysis platform development or related systems
 - Hands-on experience with web analytics tools (Google Analytics, Adobe Analytics)
 - Proficient in SQL and/or Python for log analysis
 - Basic understanding of Shell script, HTML, JavaScript, and SQL
 - Effective communication with data engineers
 - English proficiency (TOEIC 800+), basic Japanese reading/writing skills
-
