[Holidays and Vacations]

Paid leave *Number of days granted varies depending on the time of entry into the company in the first year

Two days off per week (Saturdays and Sundays), national holidays, year-end and New Year holidays,

Summer vacation (3 days), parental leave, congratulation or condolence leave

スキル・資格**[Required]**

- Experience in uboot development for SoC, Linux development, and Linux driver development (3+ years total)
- Experience in implementation, debugging, testing, and evaluation of applications using C (5 years or more)
- Ability to plan and execute new development work and evaluation testing work on your own, making full use of this experience

[Preferred]

- Basic knowledge of software and hardware related to SoC and microcontrollers
- Experience in evaluation and debugging of embedded devices with SoC or microcontroller
- Experience in Linux application software development
- Experience in operating tools such as GitHub/GitLab, Jenkins, etc.
- Experience in 3D graphics driver development
- OpenGL/OpenGL ES SDK development
- Customer technical support
- Experience in management

[Others]

- Must have experience in performing tasks, as you will be required to plan work autonomously and direct other engineers.

[Ideal Applicants]

- Interested in new technologies and willing to acquire these skills.
- Able to work proactively to promote the results of research and development to customers
