## 募集要項

As a Lead Consulting Engineer, you will be responsible for designing, implementing, and optimizing complex customer networks, ensuring seamless operations. You will also provide technical leadership, documentation, and mentorship to other engineers.

## Client Details

A global IT services company supporting a major international telecommunications client. This role offers an opportunity to work on high-impact network infrastructure projects within a dynamic and innovative environment.

## Description

- Design and implement network solutions, including WAN, LAN, and data center infrastructure.
- Act as a technical lead for network upgrades, migrations, and troubleshooting.
- Provide documentation and mentorship to engineers.
- Support incident and problem management processes.

**Job Offer**

- Opportunity to work on advanced network technologies in a global environment.
- Leadership role with direct impact on strategic IT infrastructure projects.
- Professional growth through technical challenges and mentorship opportunities.
- Hybrid work environment with a focus on work-life balance.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Naoko Toda at +81 3 6832 8648.

---

**スキル・資格**

- Strong experience in network design and support in enterprise environments.
  - Expertise in SD-WAN (Viptela, IOS-XE) and modern networking technologies.
  - Familiarity with Cisco ACI, MPLS, BGP, and QoS is a plus.
  - Japanese N1 level and business-level English proficiency.
-
