募集要項

Our client is seeking a skilled Java Developer to join one of their most essential and high-impact projects. This is a unique opportunity to contribute to a critical system that directly supports the organization's core business functions. As a Java Developer, you will collaborate with cross-functional teams to design, develop, and maintain scalable and efficient applications.

Client Details

Japan's biggest E-commerce company. At the forefront of the industry, focused on developing high-traffic web products in collaboration with global stakeholders. Innovation, collaboration, and a commitment to excellence define our client's work

culture.

Description

- Design, develop, and maintain robust and scalable Java applications using the Spring Boot framework.
- Participate in the full software development lifecycle, including requirements gathering, system design, coding, testing, and deployment.
- Collaborate with stakeholders and cross-functional teams to deliver high-quality software solutions.
- Write clean, maintainable, and efficient code while adhering to best practices and coding standards.
- Identify and resolve performance and scalability issues.
- Lead small to medium-sized development teams by assisting with task identification, technical decisions, and providing guidance.
- Conduct code reviews to ensure code quality and knowledge sharing.
- Document software design, processes, and system configurations.

Job Offer

- Opportunity to shape the development of high-impact web products.
- Collaborative work environment with a focus on innovation and continuous learning.
- Competitive compensation and benefits package.
- Work with skillful people from all over the world.
- 3 free meals at the cafeteria.
- Shops, restaurants, cafes, and big parks nearby.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Stella Zha on +813 6832 8972.

スキル・資格

- At least 8+ years of hands-on experience in backend development using Java and the Spring Boot framework.
- 8+ years of experience designing, developing, and maintaining high-traffic web products.
- Experience or knowledge of both frontend and backend development technologies.
- Experience working in Agile teams, especially using Scrum methodologies.
- Proficiency with deployment environments, including containerization technologies like Docker.
- Strong leadership skills with experience in guiding small to medium-sized development teams.
- Solid understanding of object-oriented programming (OOP) principles and design patterns.
- Experience with relational databases (e.g., MySQL, PostgreSQL, Oracle) and SQL.

会社説明

Japan's biggest E-commerce company. At the forefront of the industry, focused on developing high-traffic web products in collaboration with global stakeholders. Innovation, collaboration, and a commitment to excellence define our client's work culture.
