募集要項

About LiNKX

LiNKX Inc. is a **unique, engineering-first tech company** based in Tokyo, where over 80% of our team are software engineers—many of whom come from international backgrounds.

Our mission is to **modernize mission-critical systems** with global innovation and Japanese engineering precision. We

have achieved rapid growth, driven by our three core pillars:

1. **FinTech Solutions**
2. **PharmaTech In-House Product – "Lab Hub"**
3. **SocialTech In-House Product – "shikAI"**

Why We're Hiring

As our core **FinTech solution business** continues to expand, we are looking for **Senior Software Engineers** to help lead the development and modernization of our clients' financial digital products.

In this growing division, we provide high-quality solutions in areas such as:

- Core Banking System Development
- FinTech Service Development (including mobile apps, APIs, etc.)
- In-house System Development & Consulting

■Learn more about our FinTech business:
https://www.linkx.dev/fintech

Key Responsibilities

As a Senior Software Engineer in the FinTech division, you will be responsible for the following:

- Collaborating with the development team to design software solutions
- Selecting technologies such as frameworks and programming languages
- Passing on knowledge of selected technologies and the architecture built
- Supporting product development and implementing in-house solutions
- Developing and managing high-performance systems, databases, and applications
- Creating high-level APIs and writing clean, maintainable code
- Testing, troubleshooting, debugging, and upgrading software
- Understanding and applying best practices for security and data protection
- Creating technical documentation

Tech Stack

- Languages: Java, Kotlin, JavaScript, TypeScript, Go, C#, etc.
- Frameworks: Spring, Vue.js, Nuxt.js, .NET Framework, etc.
- Cloud: AWS, GCP, Azure

Why LiNKX?

■**Engineering-First Culture** – Collaborate with top engineers using modern tech stacks
■**Meaningful Work** – Contribute to secure, high-impact financial systems
■**Truly Global Team** – Work in an international and inclusive environment
■**Continuous Learning** – Grow your skills and shape the future of FinTech

---

スキル・資格

Requirements

Must-Have:

- Proficiency in at least one of these frameworks or languages (at least 5 years in one of them or at least 3 years in each of the two): **Go, Java, Spring, C#, .NET**
- Experience with projects using microservices or event-driven architecture
- Cloud infrastructure experience (AWS, GCP, or Azure)

Nice-to-Have:

- Experience with Agile development style
- Leadership skills
- Japanese proficiency at conversational level (N3 or above)

Interview Process

1st: Interview (Online)
2nd: Interview (Skill Test Online)
Final: Interview (Face-to-face at our office)
