### 募集要項

#### Job Content:

##### 1. Network and IT Equipment Design, Installation, and Maintenance

- Design, select, construct, install, and maintain networks and IT equipment at head office, branch offices, and distribution centers.
- Configure internet lines, firewalls, L2 switches, APs, IP-PBX systems, new telephone installations, troubleshooting, and vendor coordination.
- Manage network equipment and phone purchases, kitting, on-site deployment, and vendor repair arrangements.

##### 1. IT Admin and IT Audit

- Account management (issuance, inventory, deletion).

- Asset management of IT equipment.
- Prepare IT training materials and provide training for L2 engineers.
- Conduct IT system inspections and audits per SOP and create new SOPs.

#### 1. IT Troubleshooting Support

- Monitor trouble statuses from the IT help desk and tools, provide temporary support, escalate as necessary, and offer on-call support.

---

### スキル・資格

#### MUST:

- 3+ years of experience managing networks, IT devices, etc.
- 3+ years of experience in IT infrastructure (network) design, equipment selection, construction, testing, and operation.
- 3+ years of project management experience.

#### WANT:

- Experience as an in-house systems engineer, in an information systems department, or with a systems integrator.
- Cisco or other vendor certifications (CCNA, CCIP, etc.) are a plus.

#### Desired Personality:

- Logical thinking skills, communication skills, verbalization skills, and teamwork abilities.

---
