募集要項

You will be part of a global cybersecurity team dedicated to protecting the digital infrastructure. Your primary focus will be on conducting in-depth security testing of web applications and APIs to uncover vulnerabilities before they become threats. This role also involves end-to-end security assessment processes-from planning and execution to reporting and retesting-ensuring the services remain secure for millions of users worldwide.

Client Details

Join a global tech innovator known for its expansive suite of online services and commitment to digital security. With a strong international presence and a vibrant work culture, this company leads in secure software development and cutting-edge cybersecurity practices.

Description

- Perform web application and API penetration testing
- Follow OWASP and industry-standard testing methodologies
- Conduct network scans using tools like Nmap and Nessus
- Report and document findings via detailed vulnerability tickets

- Lead pre-test meetings and ensure all conditions are met
- Support vulnerability remediation and conduct re-testing

Job Offer

- Tokyo-based hybrid role at a modern accessible office
- International and English-speaking work environment
- Opportunity to advance your career in a highly skilled international security team

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Taishi Oyamada on +813 6832 8665.

スキル・資格

- Experienced in web application penetration testing
 - Skilled in network scanning and vulnerability assessments
 - Strong attention to detail with analytical mindset
 - Business-level English (Japanese proficiency is optional)
 - Bonus: Knowledge of cloud security and/or mobile app security
-
